

Unveiling Nepal's Waterscape: Pioneering Policies and Technologies

Presenter: George Joseph

Job title: Senior Economist

Affiliation: World Bank

KGID
CAIRO

High levels of
poverty

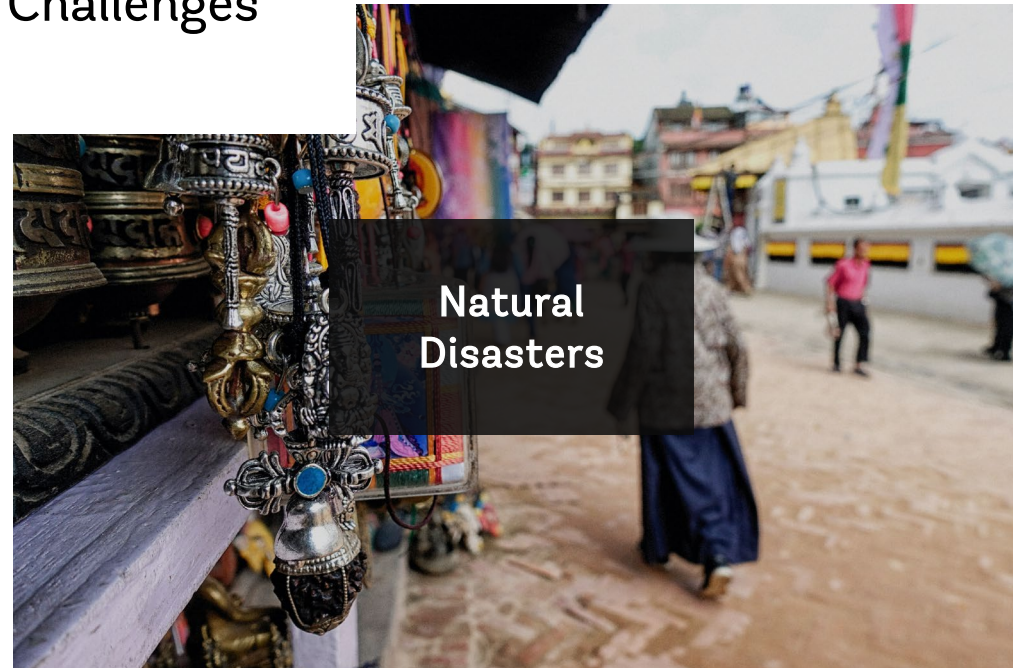

Low Human
Capital and
High Stunting
Rates

Nepal is facing a host of
Development Challenges

Increasing
Urbanization

Natural
Disasters

Nepal's Answer is GRID

GRID Program

To improve the enabling environment for a green, climate-resilient, and inclusive development pathway

GRID DPC Pillars

- Pillar 1: Consolidating GRID principles in strategic development planning
- Pillar 2: Sector policies for GRID

GRID DPC Policy Tracks

Pillar 1

Climate-and
disaster-resilient
infrastructure

Strategic planning
for GRID

Transforming land
use and
management

Addressing air
pollution and GHG
emissions to protect
human capital and
mitigate climate
change

Improving the
enabling
environment for
a green,
climate-
resilient,
inclusive
development
pathway

Pillar 2

Building resilience of
the most vulnerable
to climate and other
shocks

Transitioning to
sustainable tourism
for jobs,
conservation, and
private sector
investment

The forest sector
transition to
sustainability,
productivity, and
climate resilience

Transitioning to
inclusive climate-
smart agriculture
(CSA) and food
systems that
promote growth and
protect health

Transitioning to
integrated water
resource
management (IWRM)
and resilient water
supply

Solid waste
management
(SWM) and reducing
single use plastics

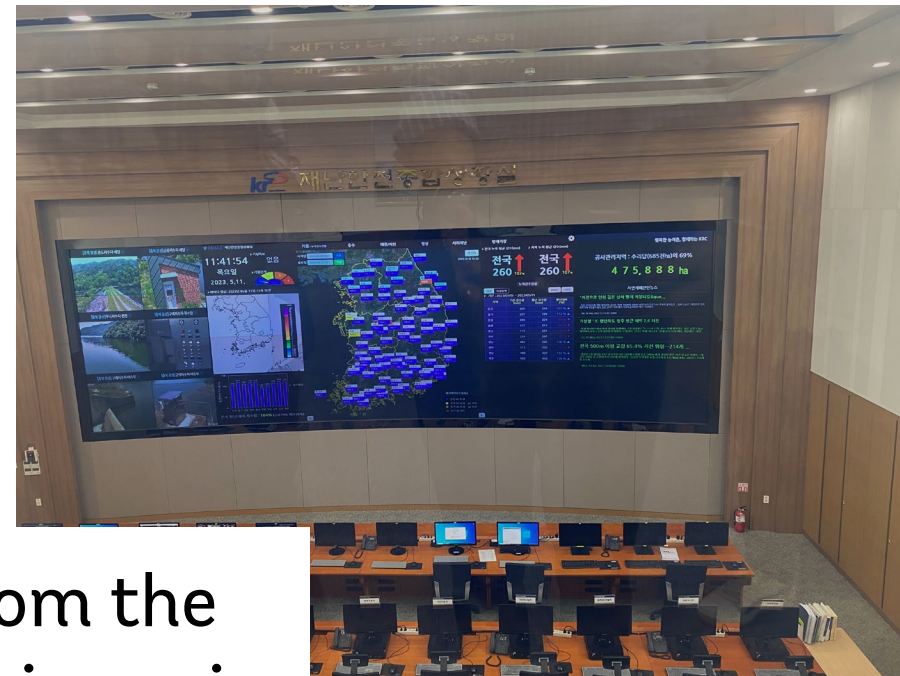

IWRM Sub-
Policy Track

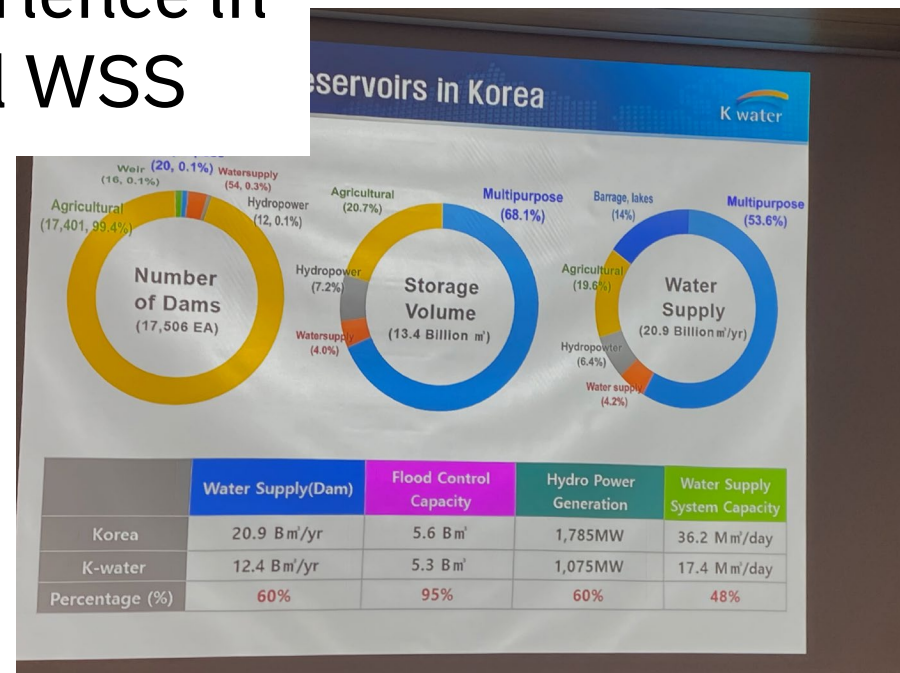

**Water is at the
Heart of the GRID
Transition**

WSS- Sub-
Policy Track

Learning from the Korean Experience in IWRM and WSS

Thank you !
